

Infrared Testing Inc. Goes Online With Web Risk Manager

Infrared Testing Enhancing Service Product with Digital Solution

For Immediate Release

CHICAGO/EWORLDWIRE/Nov. 19, 2004 --- Infrared Testing Inc. will be putting its large accounts online with Web Risk Manager this month. The company's decision will give its customers more choices on how to manage its infrared inspections, stewardship reports and recommendations. "Our customers are excited about our service enhancement. Keep in mind we are only using about 20 percent of the WRM system for our needs. We should have more announcements soon about how we will take advantage of the other tracking modules for our customers in 2005," said ITI Vice President Dan Malagoli.

Web Risk Manager is not only a digital management system for ITI's content, but it is turning into a collaboration center for its customers as well. The WRM systems does much more than hold important risk management data; it offers a way for customers to evaluate the report data and make needed decisions mitigating risk exposure globally. Being first to market has given ITI a competitive edge in the marketplace. "We are going to use this tool to demonstrate our quality product to a whole new level in 2005. This tool will also expand our marketplace beyond risk management," added Malagoli.

About Infrared Testing Inc.

Infrared Testing Inc. is a global infrared testing company providing service to national and international companies. Infrared Testing Inc. was founded in Chicago in 1989 by Terrence Malagoli. Since that time, the company has grown from a small, local testing group to a worldwide industry leader.
